

Ertugrul Egemen

(electric-electronics engineer)

I had many successes, despite my dyslexia problem. I graduated at Political Sciences in the most prominent and deep rooted faculty in Turkey (called Mekteb-i Mulkiye). I was a vice governor for fourteen years. I am also an engineer on electric-electronics branch. I had my own patent and some theories about science. At National cups, I won golden and bronze medals with compound archery team. I am married with three children.
